

Heritage Pump Lines

Troughout our history, various investments have made our company stronger. One of those was the acquisition of an exclusive license to manufacture 8 pump lines, along with their spare parts, of the brands Byron Jackson and Ingersoll-Rand.

We are the Original Equipment Manufacturer and do not have to resort to not-original engineering data when servicing or manufacturing parts for these Byron Jackson and Ingersoll-Rand pumps. We know all the design and manufacturing specifications for these heritage pump ranges, so you can be completely assured that we are capable of providing repair services and spare parts for these specific pump models.

A large number of these vertical and horizontal centrifugal pumps from our heritage pump ranges still operate in many industries around the world. We are able to supply spare parts, repair and maintenance packages, recommended upgrades, rebowls and failure analysis to ensure your equipment will perform beyond expectations.

Ruhrpumpen's heritage pumps include:

Byron Jackson (vertical):

- HQ
- HX, KX, RX and WX (except 93")
- VLT
- VMT

Ingersoll-Rand (horizontal):

- CGT
- J and JD

RP provides parts, service and support for Byron Jackson and Ingersoll-Rand heritage pump lines.

Reliability

By using genuine OEM spare parts, you can avoid system failures that are dramatically increased when using parts produced by a replicator. Avoid dangerous situations, unprogrammed downtimes and expensive repairs.

Precise Tolerances

Even the slightest variance can generate significant inefficiencies to your system. We own the original patterns and all the information to manufacture spare parts for your old pump.

Global Service Network

Our ISO certified manufacturing plants and service centers around the globe can provide service and support to these vertical Byron Jackson pumps and horizontal Ingersoll-Rand pumps.
