# RP's ZMS pumps selected for water station in Qurayyat, Oman

The water transmission pipeline from the Pump Station IWP beside the desalination plant in Qurayyat which is pumping water to Muscat city is one of the various projects the Public Authority for Electricity and Water (PAEW) is executing in order to achieve water security to all people in the Sultanate of Oman.

***Elecnor, a global leading corporation in project development, construction and operation, selected our ZMS pumps for the potable water station.***

6 ZMS pumps with a capacity of 2,272 m<sup>3</sup>/hr @386 m and Siemens motors of 3,600 kW were manufactured in Witten and delivered successfully on site in March 2017.

ZMS pumps ready at our Witten facility.

# Piping setup guidelines for OH pumps

Frequently, pumps are installed with unsuitable piping arrangements, which may cause untimely damage and unexpected downtimes. In order to prevent premature pump failure, installation should be done with an adequate piping setup.
